Frederic C. Stieg	1		
Rejected or Cancelled	1,517		
Total Specimens Tested	46,131		

Practice Summary Report

In accordance with SAMHSA, the cutoff level of a drug test is the point of measurement at or above which a result is considered positive and below which a result is considered negative. For any given drug, this level is established on the basis of the reliability and accuracy of the test.

For questions or more information on this report, or to speak with a clinical specialist or toxicologist, please call our RADAR hotline at 866.866.0605.

Practice Summary Report

Assessment Period: 1/1/2013 - 12/31/2017

Specimen Type: Urine & Oral Fluid

Practice Name: Elite Medical and Rehabilitation - Roosevelt

Practice ID: 225496
